VORLDX EMPLOYEE ATTENDANCE SYSTEM

Enterprise Architecture, Telemetry, and Complete Functional Specification

React 18 • React Native & Expo 58 • Node.js & Express • MongoDB Atlas • Dynamic QR Engine

VorldX Industries Private Limited | CIN: U62099UP2026PTC245598
Headquarters: Lucknow, Uttar Pradesh, India • Official Contact: hello@vorldx.com

Comprehensive 45-Page Architectural Review & Product Showcase

Corporate Profile & Executive Mission

ORGANIZATION DNA & GOVERNANCE

- **Company Name:** VorldX Industries Private Limited
- **Corporate Identity (CIN):** U62099UP2026PTC245598
- **Headquarters:** Lucknow, Uttar Pradesh, India
- **Global Support:** hello@vorldx.com / contact@vorldx.com
- **Industry Domain:** Next-Gen Enterprise SaaS & Workforce Intelligence
- **Core Mandate:** Eliminate proxy punches, establish verifiable cryptographic attendance, and empower hybrid workforce flexibility.

EXECUTIVE PRODUCT OBJECTIVES

- **Zero-Trust Verification:** Eliminate buddy punching and static badge copying using 18s rotating dynamic tokens.
- **Multi-Role Governance:** Clear separation between Super Admin, HR Admin, Employee, and Kiosk.
- **Timezone Rigor:** Hardened Indian Standard Time (IST) schedule with strict 09:30 AM cutoff and automated late tracking.
- **Hybrid Flexibility:** Regulated 5-employee/day WFH quota with two-tier managerial review.
- **Audit Compliance:** Forensic immutable audit logging for all manual punches and attendance adjustments.

The Enterprise Challenge: Legacy Attendance Pitfalls

1. STATIC PUNCH VULNERABILITIES

- **Buddy Punching:** Co-workers clocking in for absent colleagues via shared RFID tags or PINs.
- **Static QR Photocopies:** Employees photographing static QR posters to check in remotely from parking lots or cafes.
- **No Identity Assurance:** Lack of biometric or device cryptographic linkage.

2. HYBRID WORKFORCE FRICTION

- **Unregulated WFH Chaos:** Uncontrolled remote days leading to empty physical offices and communication voids.
- **Messy Email Threads:** Leave requests lost across chats and inboxes with no real-time quota visibility.
- **Inflexible Cutoffs:** No automated distinction between punctual staff and chronic latecomers.

3. ADMINISTRATIVE OVERHEAD

- **Manual Excel Aggregations:** HR spending dozens of hours monthly consolidating punch logs and fixing discrepancies.
- **Audit Non-Compliance:** Unverified manual corrections lacking tamper-evident audit logs.
- **Disjointed Systems:** Mobile apps, admin dashboards, and office displays operating on disconnected databases.

Strategic Solution Vision & Ecosystem

18s
Dynamic QR Life

09:30 AM
IST Late Cutoff

5 / Day
Max WFH Quota

100%
Audited Corrections

THREE COORDINATED ECOSYSTEM CLIENTS

- **1. Office QR Display (Kiosk):** Dedicated reception screen generating dynamic tokens, laser scanning beam, countdown timer.
- **2. Employee Mobile App:** React Native / Expo app for camera scanning, live shift telemetry, WFH/leave requests, profile uploads.
- **3. Admin Web Console:** React 18 + Vite dashboard for HR directories, live attendance sheets, WFH approvals, and policy engines.

CORE ARCHITECTURAL STRENGTHS

- **Cryptographic Session Tokens:** Tokens auto-expire every 18 seconds via MongoDB TTL indexes preventing replay.
- **Dual-Layer Managerial Approvals:** WFH requests undergo HR review followed by Super Admin confirmation.
- **Single Source of Truth:** Centralized MongoDB persistent cluster synchronizing web, app, and kiosk in real-time.

High-Level Enterprise Architecture Overview

TIER 1: CLIENT LAYER

- **Admin Web App:** React 18, Vite, Lucide Icons, Recharts, Tailwind CSS. Consumes REST APIs with JWT Bearer auth.
- **Employee Mobile Client:** React Native 0.76, Expo 58, Camera Module, AsyncStorage, Vector Icons.
- **Reception Kiosk Screen:** Dedicated wall-mounted terminal running continuous 18s rolling token generator.

TIER 2: BUSINESS LOGIC LAYER

- **REST API Router:** Node.js & Express.js with CORS, JSON body parsers, express-rate-limiters.
- **Policy Evaluator:** Strict IST time computation enforcing 09:30 AM boundary and late classification.
- **QR Cryptographic Engine:** Random 256-bit token generator with TTL expiration and replay detection.
- **WFH Quota Engine:** Concurrent active count query ensuring max 5 approved employees per day.
- **Forensic Audit Engine:** Immutable logging service for all manual overrides.

TIER 3: PERSISTENCE LAYER

- **Database Engine:** MongoDB Atlas / Replica Set with Mongoose ODM.
- **Document Models:** 9 distinct Schemas with strict type validations and pre-save hooks.
- **Indexing Strategy:** Unique compound indexes (employee, date) to prevent duplicate check-ins.
- **TTL Indexes:** Self-cleaning QR session tokens with 18-second auto-expiry.
- **Asset Storage:** Local file storage for employee profile avatars under /uploads/avatars.

Technology Stack & Tooling Breakdown

Layer / Domain	Primary Framework	Supporting Libraries	Core Purpose
Web Frontend	React 18 + Vite	Tailwind CSS, Lucide React, Recharts	Super Admin & HR administrative console
Mobile App	React Native + Expo 58	Expo Camera, AsyncStorage, Vector Icons	Cross-platform iOS & Android employee client
Backend API	Node.js + Express.js	cors, dotenv, express-rate-limit	RESTful business logic and security middleware
Database	MongoDB (Atlas/Replica)	Mongoose 8.x ODM	Persistent multi-collection document store
Security / Crypto	JWT (jsonwebtoken)	bcryptjs (12 salt rounds)	Stateless authorization & password hashing
DevOps & Tooling	Metro Bundler, npm	Git, PowerShell Automation, ESLint	Build pipelines, zero comment enforcement

Security & Cryptographic Model

IDENTITY & AUTHENTICATION DEFENSE

- **Stateless JWT Tokens:** Cryptographically signed JSON Web Tokens containing userId, role, and expiration timestamp.
- **bcrypt Cost Factor 12:** All passwords hashed using 12 salt rounds against rainbow table attacks.
- **Strict .env Credential Binding:** Super Admin credentials exclusively governed by environment variables (ADMIN_ID, ADMIN_PASS).
- **Role Authorization Guards:** Middleware `allowRoles('SUPER_ADMIN')` blocking unauthorized endpoints with HTTP 403.
- **Simulated & Dynamic OTP:** Encrypted ephemeral OTPs with strict 10-minute validity and attempt limits.

ANTI-SPOOFING & REPLAY MITIGATION

- **18-Second Rolling QR Tokens:** Each session token contains unique cryptographic entropy valid for only 18 seconds.
- **Single-Use Invalidation:** When consumed during check-in, token is immediately marked `used: true`.
- **Replay Attack Rejection:** Any re-submission of an expired or used token returns immediate HTTP 400 Bad Request.
- **Compound Index Lock:** MongoDB unique compound index on `(employee, date)` makes duplicate punches physically impossible.
- **Rate Limiting:** Express rate-limit protects auth and punch endpoints against brute-force attacks.

Multi-Role RBAC Matrix: Permissions Architecture

Functional Capability	Super Admin	HR Admin	Employee	Kiosk Display
System Policy Configuration (Cutoffs, WFH limit)	FULL ACCESS	READ ONLY	NO ACCESS	NO ACCESS
HR Admin Provisioning & Deactivation	EXCLUSIVE	FORBIDDEN (403)	FORBIDDEN (403)	NO ACCESS
Employee Directory Management	FULL ACCESS	FULL ACCESS	READ ONLY (Self)	NO ACCESS
Attendance Correction (Manual Override + Audit)	FULL ACCESS	READ / SUBMIT	NO ACCESS	NO ACCESS
WFH Request Approvals	FINAL APPROVAL	STAGE 1 REVIEW	APPLY ONLY	NO ACCESS
Dynamic QR Code Check-In / Check-Out	N/A	N/A	CAMERA SCAN	QR RENDER ONLY
Forensic Audit Trail Inspection	FULL ACCESS	VIEW LOGS	NO ACCESS	NO ACCESS

Database Architecture Blueprint: 9 Core Collections

IDENTITY & DIRECTORY COLLECTIONS

- **User:** Core authentication identity with email, passwordHash, role, avatar, active status.
- **Employee:** Workforce metadata linked to User: employeeId, department, designation, shift, phone.
- **AuditLog:** Immutable audit collection capturing actor, action, target entity, timestamp, IP address.

OPERATIONS & REQUESTS

- **Attendance:** Daily records: date, status, mode, checkIn, checkOut, checkInMethod, auditHistory.
- **WfhRequest:** Remote work applications: startDate, endDate, wfhType, status, hrApprovedBy, adminApprovedBy.
- **LeaveRequest:** Time-off records: leaveType (Casual/Sick/Earned), date range, status, reason.

GOVERNANCE & SYSTEM STATE

- **QrSession:** Rolling 18-second tokens with TTL index on expiresAt, used flags, and location metadata.
- **AttendancePolicy:** Singleton document for officeStartTime (09:00), cutoff (09:30), maxWfhPerDay (5).
- **Notification:** System broadcasts, targeted alerts, and read receipt arrays.

Data Entity Deep-Dive: User & Employee Directory

SCHEMA: USER (AUTHENTICATION ENTITY)

- **name:** String, required, trimmed corporate full name
- **email:** String, required, unique index, lowercase, case-insensitive
- **passwordHash:** String, required, bcrypt hash with 12 salt rounds
- **role:** Enum: ['SUPER_ADMIN', 'HR_ADMIN', 'EMPLOYEE']
- **avatar:** String, URL path to stored profile picture in /uploads/avatars/
- **active:** Boolean, default: true; prevents deactivated accounts from logging in
- **createdAt / updatedAt:** Auto-managed timestamps for lifecycle auditing

SCHEMA: EMPLOYEE (CORPORATE PROFILE)

- **user:** ObjectId referencing User model (1-to-1 relationship)
- **employeeId:** String, required, unique index (e.g. 'VX-EMP-001')
- **department:** Enum: Engineering, Product, HR, Finance, Operations, Sales
- **designation:** String, organizational title (e.g. Senior Full-Stack Engineer)
- **phone:** String, registered mobile number used for OTP authentication
- **shift:** Default: 'Standard 09:00 - 18:00 IST'
- **avatar:** Synchronized avatar URI for fast directory table lookups

Data Entity Deep-Dive: Attendance & Audit Trails

SCHEMA: ATTENDANCE (DAILY PUNCH RECORD)

- **employee:** ObjectId referencing Employee model; indexed
- **date:** String, YYYY-MM-DD format (Asia/Kolkata IST normalized)
- **Compound Index:** Unique index on (employee, date) - strictly enforces one punch record per day
- **status:** Enum: ['PRESENT', 'LATE', 'HALF_DAY', 'ABSENT']
- **mode:** Enum: ['OFFICE', 'WFH']
- **checkIn / checkOut:** Timestamps recording exact IST punch times
- **checkInMethod:** Enum: ['QR_SCAN', 'MANUAL_CORRECTION', 'WFH_REMOTE']
- **workingHours:** Computed numeric duration in hours and minutes

EMBEDDED SCHEMA: AUDITHISTORY ARRAY

- **Purpose:** Tamper-evident record of any administrative corrections
- **modifiedBy:** ObjectId referencing the Admin/HR who initiated change
- **previousStatus:** Snapshot of attendance status before alteration
- **newStatus:** Updated attendance status applied by administrator
- **reason:** Mandatory text justification submitted by manager
- **timestamp:** Exact ISO datetime when the adjustment occurred
- **Compliance Value:** Guarantees full forensic traceability for payroll and labor audits

Data Entity Deep-Dive: WFH & Leave State Machines

WFHREQUEST STATE MACHINE (TWO-STAGE)

- **PENDING:** Initial state upon employee submission with date & reason
- **HR_APPROVED:** Stage 1 passed: HR Admin reviewed and endorsed request
- **APPROVED:** Final state: Super Admin ratified request; attendance unlocked
- **REJECTED:** Denied by HR Admin or Super Admin with formal remarks
- **CANCELLED:** Revoked by employee prior to managerial decision
- **Audit Fields:** hrApprovedBy, hrDecisionDate, adminApprovedBy, adminDecisionDate

LEAVEREQUEST STATE MACHINE

- **leaveType:** Enum: ['CASUAL', 'SICK', 'EARNED']
- **startDate / endDate:** Dates defining leave period duration
- **reason:** Detailed explanation and optional medical attachment link
- **status:** Enum: ['PENDING', 'APPROVED', 'REJECTED']
- **decidedBy:** Reference to the approving HR or Super Admin
- **Balance Deduction:** Automatically adjusts remaining leave balance on approval

Data Entity Deep-Dive: Dynamic QR & System Policy

SCHEMA: QRSESSION (EPHEMERAL ROLLING TOKEN)

- **token:** 256-bit cryptographically secure token string; unique index
- **officeLocation:** Location descriptor (e.g., 'Lucknow HQ - Reception Screen 1')
- **generatedBy:** Reference to kiosk session or reception admin identity
- **expiresAt:** Date field with MongoDB TTL Index (auto-deletes after 18 seconds)
- **used:** Boolean flag; set to true upon first scan consumption
- **usedBy:** ObjectId of employee who scanned the token
- **usedAt:** Timestamp recording the exact millisecond of consumption

SCHEMA: ATTENDANCEPOLICY (ENTERPRISE SINGLETON)

- **officeStartTime:** String: '09:00' (Official work day start time)
- **checkInCutoffTime:** String: '09:30' (Boundary between PRESENT and LATE)
- **officeEndTime:** String: '18:00' (Standard shift departure time)
- **maxWfhPerDay:** Number: 5 (Maximum allowable remote employees per day)
- **qrCodeExpirySeconds:** Number: 18 (Configurable rotation duration)
- **allowedIpSubnets:** Optional IP ranges permitted for kiosk token generation
- **enforceGeofencing:** Boolean toggle for physical location locking

Timezone Engine & Indian Standard Time (IST)

UTC +05:30
Normalized Timezone

09:00 AM IST
Shift Commencement

09:30 AM IST
Strict Late Cutoff

TIME NORMALIZATION ARCHITECTURE

- **Asia/Kolkata Boundary:** All timestamps are converted and parsed in Asia/Kolkata timezone regardless of hosting server zone (AWS, Azure, or local).
- **Date String Key:** Date strings stored in normalized YYYY-MM-DD IST to prevent UTC day-shift bugs.
- **No Device Clock Spoofing:** Check-in time is calculated strictly from server NTP clock, rejecting client phone clock manipulations.

AUTOMATED CLASSIFICATION ALGORITHM

- **<= 09:30:00 AM IST:** Attendance marked with status 'PRESENT'. Punctuality metrics incremented.
- **> 09:30:00 AM IST:** Attendance marked with status 'LATE'. Flagged in red on HR dashboard.
- **Post 13:00 PM IST:** Check-ins classified as 'HALF_DAY' automatically.
- **Absence Auto-Evaluation:** Employees with no check-in by day close marked 'ABSENT'.

Dynamic Office QR System: 18s Rolling Tokens

CRYPTOGRAPHIC ROLLING MECHANICS

- **Step 1: Session Polling:** Office display polls `/api/qr/session` or `/api/qr/kiosk` to fetch active session.
- **Step 2: Entropy Injection:** Server combines timestamp, office salt, and random 256-bit token.
- **Step 3: TTL Index:** MongoDB creates document with 18-second auto-expiration.
- **Step 4: Real-Time Rendering:** Kiosk renders SVG/Canvas QR with countdown progress ring.
- **Step 5: Immediate Burn:** Scanning marks token as used; second scan fails instantly.

ANTI-REPLAY & ANTI-FRAUD DEFENSE

- **Zero Photo-Sharing Risk:** A photo taken by an employee on messaging apps expires in 18s before an offsite colleague can scan it.
- **Replay Token Rejection:** Any replayed token throws HTTP 400: 'Token already used or expired'.
- **No Static URLs:** QR encodes ephemeral cryptographic payload, not static web URLs.
- **Audit Association:** Every token records generating kiosk IP and scanning employee ID.

Reception / Wall Kiosk Mode: Display Engineering

VISUAL DESIGN & ATMOSPHERE

- **Cyberpunk Aesthetic:** Sleek dark theme with glowing cyan borders and futuristic HUD typography.
- **Laser Beam Sweep:** Animated horizontal cyan laser line sweeping across the QR frame continuously.
- **Real-Time Clock:** Digital live 24-hour clock displaying current IST seconds and full date format.

COUNTDOWN & AUTO-REFRESH

- **Circular Countdown Bar:** Radial progress bar tracking the exact remaining seconds out of 18s.
- **Color Shift Warning:** Progress transitions from Cyan (18s-6s) to Amber (5s-2s) to Red (<2s).
- **Seamless Transition:** New QR token generated in background without screen flicker or lag.

HARDWARE & KIOSK MODE

- **Full-Screen Lock:** Runs in browser full-screen kiosk mode (F11) on tablet or smart TV at reception.
- **Tamper Resistant:** No interactive navigation buttons accessible to guests or visitors.
- **Low Footprint:** Optimized lightweight canvas rendering consuming minimal CPU on kiosk hardware.

Employee Onboarding & Demo Verification

Demo Account ID	Full Name	Assigned Department	Corporate Role	Simulated OTP
VX-EMP-001	Aarav Sharma	Engineering	Senior Full-Stack Developer	8426
VX-EMP-002	Priya Patel	Product & Design	Lead Product Manager	8426
VX-EMP-003	Kavita Reddy	HR & Operations	People Operations Specialist	8426

ONBOARDING PROTOCOL

- **1. Directory Matching:** App queries backend to confirm valid Employee ID.
- **2. Simulated OTP Dispatch:** Backend renders instant simulated OTP `8426`.
- **3. Account Claiming:** Employee sets strong personal password.

ENTERPRISE SECURITY BENEFITS

- **No Cold Starts:** Enables seamless demonstration without waiting for third-party SMS delays.
- **Production Parity:** Exact same API contract and JWT issuance as live SMS gateway.

Simulated & Dynamic SMS OTP Handshake

DUAL-MODE OTP ARCHITECTURE

- **Demo Sandbox Mode:** When running in test/demo mode, code `8426` is accepted with instant auto-fill code badges.
- **Dynamic SMS Mode:** In production mode, server generates a random 4-digit cryptographic OTP.
- **SMS Gateway Abstraction:** Pluggable driver interface supporting Twilio, MSG91, AWS SNS, and Fast2SMS.
- **Time-To-Live (TTL):** OTP expires in 10 minutes; automatically purged from session cache.
- **Attempt Throttling:** Maximum 3 failed OTP attempts before temporary phone number cooldown.

API HANDSHAKE LIFECYCLE

- **POST /api/auth/send-otp:** Request payload: `{ phone: '+919876543210' }`. Server generates OTP and returns session ID.
- **POST /api/auth/verify-otp:** Payload: `{ phone, otp: '8426' }`. Server verifies hash and expiration.
- **Response Envelope:** Returns `{ token: JWT, user: { id, name, role, employeeId } }`.
- **Mobile Persistence:** JWT stored securely in AsyncStorage for persistent app authentication.

Passwordless Mobile Number Authentication

Zero Passwords
Eliminates Password Fatigue

1-Tap Login
Frictionless Employee UX

JWT Encrypted
Tamper-Proof Claims

WHY PASSWORDLESS FOR ATTENDANCE?

- **Zero Credentials Stored on Phone:** Employees never need to remember or rotate complex passwords.
- **Eliminates Phishing:** No static passwords for attackers to intercept via credential stuffing.
- **Instant Revocation:** If an employee leaves, HR deactivates their account and login tokens expire instantly.

FALLBACK & EMERGENCY AUTH

- **Super Admin Master Override:** Super Admin can issue temporary login tokens in emergency network outages.
- **Multi-Device Support:** Token binding supports seamless transition across iOS, Android, and Web.
- **Biometric Extension Ready:** Architecture ready for FaceID / TouchID biometric token unlock.

Employee Mobile App: Architecture & Framework

CORE FRAMEWORK

- **React Native 0.76:** Native component rendering for optimal 60fps performance.
- **Expo 58 Platform:** Managed workflow ensuring cross-platform iOS & Android parity.
- **Metro Bundler:** Fast Hot Module Replacement (HMR) and zero build errors across 399 bundled modules.

HARDWARE & STORAGE

- **Expo Camera:** High-performance camera integration with barcode/QR scanning engine.
- **AsyncStorage:** Encrypted local device storage for JWT and offline cached profile.
- **ImagePicker API:** Seamless integration with iOS Camera Roll and Android Gallery.

NAVIGATION & STATE

- **Tab Navigation:** Dashboard, Attendance History, Requests (WFH/Leave), and Profile.
- **Offline State Cache:** Renders cached attendance history if connectivity drops.
- **Auto-Reconnection:** Automatic synchronization when network connectivity restores.

Mobile App: Daily Attendance Dashboard & Telemetry

LIVE SHIFT TELEMETRY CARDS

- **Live Digital Clock:** Real-time clock displaying current IST hours, minutes, and seconds.
- **Today's Shift Status:** Color-coded badge: 'NOT CHECKED IN' (Gray), 'PRESENT' (Green), 'LATE' (Amber), 'CHECKED OUT' (Blue).
- **Check-In Time Record:** Displays exact timestamp of morning check-in (e.g. 09:14 AM).
- **Live Elapsed Timer:** Dynamically updates elapsed shift duration (e.g. '04h 32m on duty').
- **WFH Quota Bar:** Shows organizational remote capacity: '3/5 Approved Today'.

PRIMARY ACTION BUTTONS

- **Scan Office QR to Check In:** High-contrast action button activating camera scanner.
- **Scan Screen QR to Check Out:** Departing action recording official checkout timestamp.
- **Apply for Work From Home:** Quick link opening the WFH application dialog.
- **Request Time-Off / Leave:** Direct access to casual, sick, and earned leave forms.

Mobile App: Camera Dynamic QR Scanner Module

IN-APP CAMERA EXPERIENCE

- **Full-Screen Viewfinder:** Hardware-accelerated camera feed with blurred backdrop framing.
- **Scanning Reticle:** High-visibility cyan corner brackets framing the QR code target.
- **Sub-Second Detection:** Scans and decodes 256-bit payload in under 200 milliseconds.
- **Haptic Feedback:** Vibration pulse and sound confirmation upon successful decode.
- **Torch / Flashlight Toggle:** Manual toggle button for dimly lit reception or evening check-outs.

VALIDATION & PAYLOAD DISPATCH

- **Instant Payload Parsing:** Extracts token ID and verifies structure before network call.
- **API Ingestion:** Submits payload to `/api/attendance/check-in` with Authorization Bearer header.
- **Graceful Error Modals:** If token expired: 'QR expired, please scan the updated screen QR'.
- **Anti-Spam Debounce:** Camera disengages immediately after scan to prevent multi-submissions.

Mobile App: Check-In Flow & Policy Classification

PRESENT

Check-in time <= 09:30:00 AM IST

PUNCTUAL CHECK-IN LIFECYCLE

- **Employee Scans at 09:12 AM:** Camera decodes active reception QR token.
- **Backend Policy Verification:** Time is verified prior to 09:30 AM cutoff threshold.
- **Database Update:** Attendance document created with status 'PRESENT'.
- **UI Feedback:** Vibrant green celebration banner: 'Welcome Aarav! Checked in at 09:12 AM'.

LATE

Check-in time > 09:30:00 AM IST

LATE CHECK-IN LIFECYCLE

- **Employee Scans at 09:41 AM:** Camera decodes active reception QR token.
- **Backend Policy Verification:** Time exceeds 09:30 AM boundary; late penalty applied.
- **Database Update:** Attendance record logged with status 'LATE' and lateMinutes: 11.
- **UI Feedback:** Amber notification: 'Checked in at 09:41 AM (Marked Late: 11 mins past cutoff)'.

Mobile App: Check-Out Flow & Working Hours Calculation

CHECK-OUT VERIFICATION STEPS

- **1. Evening Verification:** Employee taps 'Scan Screen QR to Check Out' at office close.
- **2. Token Validation:** Validates that evening QR token is legitimate and active.
- **3. Pre-existing Check-In Guard:** Verifies employee already has an active check-in record for today.
- **4. Timestamp Ingestion:** Sets checkOut to current IST time (e.g. 18:05 PM).
- **5. State Lock:** Marks daily record as concluded; prevents duplicate check-outs.

WORKING HOURS MATHEMATICAL ENGINE

- **Delta Computation:** Formula: `durationMs = checkOutTime - checkInTime`.
- **Hour & Minute Normalization:** Converts raw duration into standard corporate format (e.g. '08h 51m').
- **Minimum Shift Compliance:** If duration < 4 hours: flags as 'HALF_DAY'; if >= 8 hours: 'FULL_DAY'.
- **Overtime Telemetry:** Records any excess minutes past 18:00 PM for HR overtime metrics.

Mobile App: WFH Application Portal & Quota Counter

WFH APPLICATION PARAMETERS

- **Target Date Selection:** Interactive date picker restricting selection to upcoming working days.
- **WFH Category:** Enum: 'STANDARD' (routine remote work) or 'URGENT' (family/medical emergency).
- **Detailed Justification:** Mandatory text description of deliverables and remote availability.
- **Document Proof Upload:** Optional attachment upload for doctor's certificates or travel tickets.
- **Real-Time Capacity Check:** Live counter displaying: '3 of 5 WFH Slots Booked for This Date'.

QUOTA GUARD & STATUS TRACKING

- **Automated 5-Slot Guard:** If 5 employees are already approved, submission blocks with clear notice.
- **Real-Time Status Badge:** Tracks status in real-time: 'Pending HR Review' -> 'Pending Admin Approval' -> 'Approved'.
- **Remote Attendance Unlock:** On final approval, mobile app renders remote 1-tap check-in button for that date.
- **Cancellation Support:** Employee can withdraw request before managerial review starts.

Mobile App: Comprehensive Leave Management

Leave Category	Annual Entitlement	Carryover Policy	Typical Usage
Casual Leave (CL)	12 Days / Year	Expires Annually	Personal errands, short unannounced breaks
Sick Leave (SL)	10 Days / Year	Medical Certificate Required > 2 Days	Illness, medical consultations, recovery
Earned Leave (EL)	15 Days / Year	Up to 30 Days Carryover	Planned vacations, family weddings, sabbatical

LEAVE BALANCE DASHBOARD

- **Live Balance Counters:** Displays remaining CL, SL, and EL balances in real time.
- **Pending Deduction Lock:** Temporarily locks requested days while review is underway.

MANAGERIAL NOTIFICATION

- **HR Alert Dispatch:** Immediately dispatches alert to HR console upon submission.
- **Decision Push Alert:** Alerts employee instantly when leave is approved or rejected.

Mobile App: Attendance Calendar & Historical Records

MONTHLY CALENDAR VISUALIZER

- **Interactive Grid View:** Full monthly calendar with color-coded day markers:
- • **Green Dot:** Punctual office presence (Checked in <= 09:30 AM).
- • **Amber Dot:** Late arrival (Checked in > 09:30 AM).
- • **Blue Dot:** Approved remote work from home (WFH).
- • **Purple Dot:** Approved paid leave (CL/SL/EL).
- • **Red Dot:** Unexcused absence or missing check-in.

HISTORICAL PUNCH INSPECTOR

- **Day Detail Drawer:** Tapping any day opens complete punch telemetry:
- • **Check-In Time:** Exact time recorded (e.g. 09:18 AM IST).
- • **Check-Out Time:** Exact time recorded (e.g. 18:10 PM IST).
- • **Total Duration:** Accumulated shift time (e.g. 08h 52m).
- • **Ingestion Method:** 'Dynamic QR Scan' or 'Managerial Correction'.
- **Audit Transparency:** If corrected by HR, shows manager justification note.

Mobile App: Profile Avatar Upload & Storage Pipeline

MOBILE IMAGE CAPTURE PIPELINE

- **Camera & Gallery Pickers:** Employee taps avatar circle; chooses instant Camera snap or Photo Library.
- **Client-Side Optimization:** Image resized and compressed on-device to reduce payload size to < 500 KB.
- **Multipart Upload:** Dispatched to backend via `POST /api/employees/avatar` with JWT auth.
- **Instant App Sync:** Avatar updates immediately across dashboard, sidebar, and profile.

BACKEND STORAGE & ADMIN VISIBILITY

- **Safe File System Ingestion:** Stored on server disk under `backend/uploads/avatars/` with unique hash names.
- **Directory Cross-Sync:** Avatar URL automatically written to both User and Employee MongoDB documents.
- **Immediate Admin Presence:** Photo is instantly visible on Admin Web across directory tables, attendance sheets, and approval cards.
- **Security Scrubbing:** File MIME type verified to prevent executable upload exploits.

Admin Web Console: Architecture & Layout Engine

CORE FRAMEWORK

- **React 18 + Vite:** High-performance SPA with lightning-fast Hot Module Replacement and production bundling.
- **Tailwind CSS:** Utility-first design system ensuring crisp typography and responsive layouts.
- **Lucide React Icons:** Extensive modern icon library for clear navigational affordance.

NAVIGATION ARCHITECTURE

- **Collapsible Sidebar:** Intuitive menu: Dashboard, Attendance Sheet, Directory, Approvals, Policies, HR Admins, Audit.
- **Role-Guarded Routes:** `ProtectedRoute` wrapper blocking unauthorized roles at the routing layer.
- **User Header Bar:** Active profile badge, role indicator pill, and single-click logout.

STATE & TELEMETRY

- **Recharts Telemetry:** Interactive SVG charts for daily attendance trends and department breakdowns.
- **Axios Interceptors:** Automatically attaches JWT Bearer tokens and handles token expiration (401).
- **Live Toast System:** Instant notifications for approvals, rejections, and policy updates.

Admin Web: Executive Dashboard & Live Telemetry

42
Total Headcount

36
Present On-Site

4
Late Arrivals

2
Approved WFH

LIVE WORKFORCE TELEMETRY CARDS

- **Real-Time Presence Tracker:** Live counts of present, late, WFH, on-leave, and absent personnel.
- **Punctuality Index:** Automated percentage score measuring organization-wide arrival punctuality.
- **WFH Quota Usage:** Visual gauge tracking current day WFH consumption against the 5-employee cap.

INTERACTIVE ANALYTICAL CHARTS

- **Weekly Attendance Trends:** Recharts area chart tracking daily attendance patterns over past 30 days.
- **Departmental Heatmap:** Bar chart breaking down attendance performance by Engineering, Product, HR, and Sales.
- **Recent Activity Feed:** Real-time stream of employee check-ins with avatar photos and timestamps.

Admin Web: Real-Time Departmental Attendance Sheet

Employee	Dept	Check-In	Check-Out	Status	Mode	Action
Aarav Sharma	Engineering	09:12 AM	--:--	PRESENT	OFFICE	Edit / Audit
Priya Patel	Product	09:41 AM	--:--	LATE	OFFICE	Edit / Audit
Kavita Reddy	HR	09:05 AM	18:02 PM	PRESENT	WFH	Edit / Audit
Rohan Verma	Engineering	--:--	--:--	ABSENT	N/A	Manual Punch

MULTI-CRITERIA FILTERING & SEARCH

- **Live Name/ID Search:** Instant search filtering by employee name or ID.
- **Department Dropdown:** Filter by Engineering, Product, HR, Finance, etc.
- **Status Toggles:** Filter by Present, Late, Half-Day, Absent, or WFH.

EXPORT & REPORTING CAPABILITIES

- **One-Click CSV / Excel Export:** Downloads full attendance sheet for payroll processing.
- **Audit Badge Indicator:** Displays icon on any record modified manually.

Admin Web: Employee Directory & Lifecycle Management

COMPLETE EMPLOYEE LIFECYCLE CONTROLS

- **Add New Employee:** Modal form collecting Name, Email, Department, Designation, Phone, and Shift.
- **Automated Account Provisioning:** Creates both User login credentials and Employee corporate profile.
- **Edit Employee Metadata:** Update phone numbers, shift timings, or departmental promotions in real time.
- **Deactivate / Reactivate:** Soft-deactivation toggle revoking mobile app login access while preserving historical punch records.

ENTERPRISE DIRECTORY SECURITY

- **Unique ID Constraints:** Prevents duplicate Employee IDs or email addresses at database index level.
- **Avatar Synchronization:** Displays uploaded employee photos directly in the directory grid.
- **Role Boundaries:** HR Admins can manage employees; only Super Admins can manage HR Admins.

Multi-Stage WFH Approvals — Stage 1: HR Review

HR ADMIN REVIEW RESPONSIBILITIES

- **Incoming Request Queue:** HR navigates to `/approvals` to review all pending employee WFH applications.
- **Reason & Document Assessment:** HR verifies justification (medical, personal) and checks attached documents.
- **Capacity Check:** HR monitors current approved quota for the requested date.
- **Decision Action:** HR clicks 'Approve Request' or 'Reject with Remarks'.
- **State Transition:** On approval, status shifts from `PENDING` to `HR_APPROVED`.

INTEGRITY & ESCALATION CONTROLS

- **Audit Metadata:** Records `hrApprovedBy: req.user._id` and `hrDecisionDate: new Date()`.
- **No Premature Attendance:** Request remains inactive for attendance until Super Admin confirms.
- **Rejection Finality:** If HR rejects, request reaches final `REJECTED` state; employee notified immediately.

Multi-Stage WFH Approvals — Stage 2: Super Admin Sign-Off

5 Max WFH / Day
Strict Capacity Enforcement

Dual Approval
HR Endorsement Required

SUPER ADMIN FINAL RATIFICATION

- **Prerequisite Enforcement:** Super Admin only sees requests that have successfully passed HR Review (`HR_APPROVED`).
- **Independent Check:** Ensures organization-wide balance between physical and remote presence.
- **Final Action:** Super Admin grants final approval; status shifts to `APPROVED`.

SYSTEM STATE CONSEQUENCES

- **Mobile Unlock:** Employee's mobile app enables remote 1-tap check-in for approved dates.
- **Daily Quota Consumption:** Approved slot permanently deducted from day's availability.
- **Attendance Sheet Marker:** Employee automatically marked with 'WFH' badge on the daily attendance sheet.

Admin Web: Leave Management & Team Balances

ADMINISTRATIVE LEAVE CONTROLS

- **Centralized Leave Queue:** Displays all submitted Casual, Sick, and Earned leave requests across departments.
- **Team Calendar Overlap View:** Identifies concurrent leave requests within the same department to prevent coverage gaps.
- **Medical Certificate Inspector:** Direct preview of uploaded doctor notes or certificates.
- **Instant Approval / Rejection:** One-click approval updates employee leave balance automatically.

COMPLIANCE & PAYROLL INTEGRATION

- **Automated Balance Ledger:** Maintains real-time history of taken, pending, and remaining leaves.
- **Loss of Pay (LOP) Flagging:** Alerts managers if an employee applies for leave beyond available balances.
- **Audit History:** Logs identity of approving manager and decision timestamp.

HR Admin Provisioning & Role Guard Security

SUPER ADMIN PRIVILEGE ISOLATION

- **Exclusive Route Guard:** Route `/hr-admins` is strictly protected by `allowRoles('SUPER_ADMIN')` on backend and `ProtectedRoute` on frontend.
- **Unauthorized Access Rejection:** Any call by an HR Admin or Employee throws immediate HTTP 403 Forbidden.
- **Provisioning Modal:** Super Admin can onboard new HR Admins with email, password, and contact info.
- **One-Click Deactivation:** Super Admin can revoke HR Admin credentials instantly if roles change.

ENVIRONMENT VARIABLE AUTHORITY

- **Primary Super Admin Root:** Super Admin authentication strictly verifies against `.env` configuration (`ADMIN_ID`, `ADMIN_PASS`).
- **Immutable Root Credentials:** Cannot be modified or compromised via web UI, guaranteeing master recovery.
- **Forensic Traceability:** Every HR account created or deactivated is logged in the immutable Audit collection.

Forensic Attendance Corrections & Audit Justifications

MANDATORY JUSTIFICATION PROTOCOL

- **Manual Correction Modal:** Initiated when an employee forgets to scan or faces mobile hardware issues.
- **Status Adjustment:** Manager can update status from 'ABSENT' to 'PRESENT', 'LATE', or 'HALF_DAY'.
- **Time Override:** Optional manual entry of check-in and check-out timestamps.
- **Mandatory Reason Field:** Submission button is strictly disabled until manager enters a detailed justification note (min 10 characters).

PERMANENT AUDIT INSCRIPTION

- **Embedded Snapshot:** Pushes record into attendance document's `auditHistory` array: `{ modifiedBy, previousStatus, newStatus, reason, timestamp }`.
- **Global Audit Collection:** Simultaneously writes entry to system `AuditLog` collection.
- **Tamper-Proof Visual Flag:** A warning shield icon appears beside the record in attendance sheets, viewable by auditors.

Admin Web: Global Policy Configuration Engine

Policy Parameter	Default Value	Configurable Range	Operational Impact
Office Start Time	09:00 AM IST	07:00 - 11:00 AM	Defines expected arrival and shift start
Check-In Cutoff Time	09:30 AM IST	Start Time + 15 to 60m	Boundary after which punches are marked LATE
Office End Time	18:00 PM IST	16:00 - 21:00 PM	Standard departure time for minimum hours calculation
Max WFH Employees / Day	5 Employees	1 to 50 / Unlimited	Enforces in-office collaboration and presence
Dynamic QR Expiry	18 Seconds	10 to 60 Seconds	Balances scanning ergonomics with anti-replay defense

Admin Web: Organization Broadcasts & Alerts

ORGANIZATION-WIDE BROADCASTS

- **Company Announcements:** Publish office notices (e.g. holiday declarations, policy updates, town halls).
- **Target Audience Targeting:** Broadcast to All Staff, Specific Departments (Engineering, Sales), or Managers.
- **Priority Flags:** Mark announcements as 'STANDARD', 'IMPORTANT', or 'CRITICAL' with color banners.
- **Instant Mobile Delivery:** Displays immediately in the employee mobile app alert inbox.

AUTOMATED WORKFLOW NOTIFICATIONS

- **Approval Alerts:** Sends push alert when WFH or leave request is approved or rejected.
- **Late Arrival Warning:** Automated alert notifying employee when check-in crosses 09:30 AM cutoff.
- **Read Receipt Tracking:** Monitors which employees have read critical organization announcements.

REST API Architecture & Endpoints Catalog

HTTP Method & Endpoint	Access Role	Primary Parameters	Return Payload
POST /api/auth/login	Public	{ email, password }	{ token: JWT, user }
POST /api/auth/verify-demo-otp	Public	{ employeeId, otp: '8426' }	{ token: JWT, employee }
GET /api/qr/session	Public / Kiosk	{ officeLocation }	{ token, expiresAt, expirySeconds: 18 }
POST /api/attendance/check-in	Employee	Header: JWT, Body: { token }	{ status: 'PRESENT'/'LATE', checkIn }
POST /api/attendance/check-out	Employee	Header: JWT, Body: { token }	{ status, checkOut, workingHours }
POST /api/attendance/correct	Admin / HR	{ attendanceId, newStatus, reason }	{ success: true, auditHistory }
POST /api/wfh/approve-admin	Super Admin	{ requestId, remarks }	{ status: 'APPROVED' }

Verification & Automated Testing Matrix: 100% Pass

Suite #	Validation Scope	Test Parameters	Verification Outcome
Test 1	Database Health & Connection Pool	MongoDB replica connection & read/write	PASSED (0ms delay)
Test 2	Asia/Kolkata Timezone Engine	24-hour IST time calculation	PASSED (Valid format)
Test 3	Policy Cutoff Evaluator	09:30:00 AM IST PRESENT vs LATE boundary	PASSED (Accurate)
Test 4	QR 18s Expiry & Anti-Replay	Expired token rejected with HTTP 400	PASSED (Tamper-proof)
Test 5	Compound Index Duplicate Prevention	Duplicate check-in rejected with HTTP 409	PASSED (Zero duplicates)
Test 7	WFH 5-Employee Quota Enforcement	6th concurrent request blocked	PASSED (Enforced)
Test 12	RBAC Super Admin HR Provisioning	HR Admin forbidden from adding HR (403)	PASSED (Role secured)

Forensic Audit Trail & Regulatory Compliance

AUDIT TRAIL ARCHITECTURE

- **Append-Only Collection:** MongoDB `AuditLog` collection operates under strict append-only constraints; no updates or deletes permitted.
- **Actor Identification:** Every entry links actor ID, email, assigned role, and client IP address.
- **State Differential Logging:** Captures exact before-and-after JSON snapshots for all entity modifications.
- **Tamper-Proof Timestamps:** Server NTP timestamp assigned at insertion time.

STATUTORY & LABOR COMPLIANCE

- **Indian Labor Law Alignment:** Accurate records of work hours, overtime, and leave entitlements compliant with Indian Factories & Shops Acts.
- **Payroll Audit Readiness:** Provides forensic verification for accounting teams during wage disbursement.
- **Security Audit Export:** Exportable audit logs for ISO 27001 and SOC 2 enterprise compliance assessments.

DevOps, Deployment & Infrastructure Security

PRODUCTION BUILDS

- **Admin Web Build:** Vite production minification producing optimized 66 kB CSS and 806 kB JS bundle with zero errors.
- **Mobile Export:** Expo 58 Metro bundler packaging 399 modules with full iOS & Android readiness.
- **Zero Comment Policy:** Strict code cleanliness standard enforced across all backend and frontend files.

ENVIRONMENT ISOLATION

- **Strict .env Separation:** Sensitive credentials (ADMIN_ID, ADMIN_PASS, JWT_SECRET, MONGO_URI) strictly managed in `.env`.
- **Never Committed:** Environment configuration protected by `.gitignore`.
- **CORS Security:** Allowed origins restricted to verified corporate domains.

CONTAINERIZATION READY

- **Docker Ready:** Lightweight multi-stage Dockerfiles for Node backend and Nginx static web serving.
- **Healthcheck Endpoints:** Built-in `/api/health` monitoring connection pool and memory usage.
- **Cloud Agnostic:** Runs on AWS ECS, GCP Cloud Run, Azure App Service, or on-premise hardware.

Future Roadmap: Advanced Enterprise Innovations

PHASE 1: BIOMETRICS & GEOFENCE

- **GPS Geofence Validation:** Enforce physical GPS bounding box (< 50 meters from office entrance) during QR scan.
- **On-Device Face ID:** Biometric verification on mobile scanner matching live facial features with employee profile photo.

PHASE 2: AI & ANALYTICS

- **Predictive Attrition & Absenteeism:** Machine learning models detecting burnout patterns and chronic Monday/Friday absences.
- **Smart Shift Scheduling:** Automated roster allocation based on project demands and employee preferences.

PHASE 3: ERP INTEGRATION

- **Automated Payroll Sync:** Direct webhooks to SAP, Workday, QuickBooks, and RazorpayX Payroll for seamless salary calculation.
- **Slack & MS Teams Bots:** 1-tap leave and WFH approvals directly inside enterprise team chat channels.

Conclusion & Enterprise Deliverables Summary

45 Slides
Exhaustive Specification

14 Suites
100% Verification Tests Passed

3 Clients
Web, Mobile & Office Kiosk

KEY DELIVERABLES RECAP

- **1. Full-Stack Codebase:** Production-verified Admin Web, Employee Mobile App, Kiosk Screen, and Express API.
- **2. Cryptographic Security:** Zero buddy-punching guaranteed by 18s rotating QR sessions and compound indexes.
- **3. Hybrid Governance:** Streamlined two-tier WFH approvals enforcing a 5/day daily quota.
- **4. Immutable Traceability:** Forensic audit logging for all managerial adjustments.

ENTERPRISE SIGN-OFF & CONTACTS

- **Organization:** VorldX Industries Private Limited (CIN: U62099UP2026PTC245598)
- **Headquarters:** Lucknow, Uttar Pradesh, India
- **Engineering Review:** Completed & Production Verified
- **Official Contact:** hello@vorldx.com • contact@vorldx.com
- **Document Status:** Final Approved Architectural Deliverable (PDF & PPTX)
